To Whom It May Concern:

As a high school wrestling coach, I take the health and wellness of our wrestlers very seriously. When I heard about a process called the Bacteria Shield System that could significantly reduce the amount of skin irritations and limit the transfer of cold/flu-like occurrences from our surfaces to my wrestlers I knew I was interested.

Thus in the fall of 2015 we had Sterile Environments apply their Bacteria Shield antimicrobial coating to our wrestling mats and entire wrestling facility including the locker and weight rooms.

Skin issues were not a problem for the entire season and the only cleaning/disinfection protocol type process we changed was the addition of Bacteria Shield; 1 application lasts the entire season.

I was so pleased with the results we again have had Sterile Environment's Bacteria Shield applied to our wrestling mats and rooms for the 2016-2017 season. Its midseason and no skin issues to speak of!

If any Coaches are looking for an affordable addition to control skin or MRSA-type issues I would highly recommend the use of Sterile Environments.
