

December 4, 2014

Peace of mind. That's what Sterile-Environments provides for me and my clients. I run a youth and adult fitness training company in Avon, Oh with over 200 people entering our gym on a weekly basis.

Cleanliness is a top priority for us, but I never felt secure enough with the way we were disinfecting our astroturf, gym flooring, and dumbbells and other equipment. Then I found Sterile-Environments.

Gus Shimrak is a great human being and a master of his trade. After meeting for only a few minutes during our consultation I knew I could trust him to provide excellent service. His company's product, Sterile Doctor, speaks for itself and is top of the line. I love the fact that it's eco-friendly, hypoallergenic, and non-toxic. And best of all, it protects against the strongest of bacteria for an entire year.

I feel much better walking into my gym knowing that my clients are safer, healthier, and at much less risk for contracting something within my four walls.

Thank you Gus for providing me with the security of having a Sterile Environment.

God Bless,
